APPENDIX B: SCOTTISH WATER SEWER ASSET PLAN

Warning! Damaging a large diameter trunk main (12"/300mm and above) can result in loss of life and major water supply and water quality problems. If you're planning any extension work in the vicinity of any large diameter mains shown on our maps, you must contact Scottish Water to arrange a site visit 08000 778 778 WELL IN ADVANCE OF THE WORKS.

Plotted By: sheila.macvicar@national-one-call.co.uk

N

The representation of physical assets and the boundaries of areas in which Scottish Water and others have an interest does not necessarily imply their true positions. For further details contact the appropriate District office.

APPENDIX C: SEPA GROUNDWATER FLOOD RISK MAP

Flood Maps

Map Legend

Groundwater

- Low Likelihood

Potentially Vulnerable Areas

Disclaimer and Terms and Conditions
All intellectual property rights are owned by SEPA or its licensors. The maps cannot be used for commercial purposes, by value added resellers or for income generating purpose. A full list of terms and conditions is available from the flood maps or by contacting flooding@sepa.org.uk.

The maps are indicative and of a strategic nature. Whilst all reasonable effort has been made to ensure that the flood maps are accurate for their intended purpose, no warranty is given by SEPA in this regard. Within any modelling technique there is inherent uncertainty. SEPA has assessed the confidence it has in the maps and has shaded areas where data is not appropriate for use or where no data is available. It is inappropriate for these maps to be used to assess flood risk to an individual property.

Acknowledgements
The maps were developed using data from various sources. Full acknowledgement of data providers and participating parties is from the flood maps.

Maps creation dates
Created: January 2014 This supersedes the Indicative River and Coastal Flood Map (Scotland)
Updated: 3 March 2015
Updated: 2 December 2015

The flood maps reflect the knowledge and data that was available to be incorporated at the time of publication.

For further queries please contact flooding@sepa.org.uk

.

APPENDIX D: SEPA RESERVOIRS INUNDATION MAP

Reservoirs Map

Map Legend

Reservoirs Inundation Map

Disclaimer and terms and conditions
All intellectual property rights are owned by SEPA or its licensors. The Controlled Reservoirs Register cannot be used for commercial purposes, by value added resellers or for income generating purpose. A full list of terms and conditions is available from the SEPA website or reservoirs@sepa.org.uk.

You may only use the Controlled Reservoirs Register for your own personal use or to enable fulfilling your duties as a reservoir manager, or an appointed reservoir engineer, in accordance with the Reservoirs (Scotland) Act 2011 only. The use of the Controlled Reservoirs Register by local authorities is permitted to assist with current reservoir duties (1975 Act) until SEPA becomes the regulator (April 2016).

Within any modelling technique there is inherent uncertainty. The reservoir inundation maps are indicative only and of a strategic nature. Whilst all reasonable effort has been made to ensure that the reservoir inundation maps are accurate for their intended purpose, no warranty is given by SEPA in this regard.

The Controlled Reservoirs Register displays the potential extent of uncontrolled releases of water from a reservoir should they occur. They do not reflect the potential consequences of an uncontrolled release of water occurring or the current flood risk that exists.

Acknowledgements
The Controlled Reservoirs Register is based upon Ordnance Survey material with the permission of Ordnance Survey on behalf of the Controller of Her Majesty's Stationery Office © Crown Copyright. Any unauthorised reproduction infringes Crown copyright and may lead to prosecution or civil proceedings.

APPENDIX G: GREENFIELD RUNOFF RATE CALCULATIONS

Greenfield runoff rate estimation for sites

www.uksuds.com | Greenfield runoff tool

Calculated by:	Tom Kearsey
Site name:	Mains of Dhuloch
Site location:	Mains of Dhuloch, DG9 0RF

This is an estimation of the greenfield runoff rates that are used to meet normal best practice criteria in line with Environment Agency guidance "Rainfall runoff management for developments", SC030219 (2013) , the SuDS Manual C753 (Ciria, 2015) and the non-statutory standards for SuDS (Defra, 2015). This information on greenfield runoff rates may be the basis for setting consents for the drainage of surface water runoff from sites.

Site Details

Latitude:	54.94927° N
Longitude:	5.14172° W
Reference:	3790443442
Date:	Sep 17 2024 17:09

Runoff estimation approach

IH124

Site characteristics

Total site area (ha):	50

Methodology

Q_{BAR} estimation method:	Calculate from SPR and SAAR
SPR estimation method:	Calculate from SOIL type

Soil characteristics

	Default	Edited
SOIL type:	3	4
HOST class:	N/A	N/A
SPR/SPRHOST:	0.37	0.47

Hydrological characteristics

	Default	Edited
SAAR (mm):	1107	1122
Hydrological region:	2	2
Growth curve factor 1 year:	0.87	0.87
Growth curve factor 30 years:	1.95	1.95
Growth curve factor 100 years:	2.63	2.63
Growth curve factor 200 years:	2.99	2.99

Notes

(1) Is Q_{BAR} < 2.0 l/s/ha?

When Q_{BAR} is < 2.0 l/s/ha then limiting discharge rates are set at 2.0 l/s/ha.

(2) Are flow rates < 5.0 l/s?

Where flow rates are less than 5.0 l/s consent for discharge is usually set at 5.0 l/s if blockage from vegetation and other materials is possible. Lower consent flow rates may be set where the blockage risk is addressed by using appropriate drainage elements.

(3) Is SPR/SPRHOST ≤ 0.3?

Where groundwater levels are low enough the use of soakaways to avoid discharge offsite would normally be preferred for disposal of surface water runoff.

Greenfield runoff rates

	Default	Edited

Q_{BAR} (l/s):	245.56	419.23
1 in 1 year (l/s):	213.64	364.73
1 in 30 years (l/s):	478.84	817.5
1 in 100 year (l/s):	645.82	1102.57
1 in 200 years (l/s):	734.22	1253.49

Good morning Tom

Thank you for sending the plans. The FRMT would have no objection to these proposals if formally consulted on a future planning application.

Kind regards,

Katia Rajovic (on behalf of)
Flood Risk Management Team

OFFICIAL

Good evening, Katia.

Thank you for your swift response to my query.

Further to my initial message, please find attached for your consideration, our proposed hardstanding catchment plans, and catchments' surface water layout plans for the site at Mains of Dhuloch.

Kind regards,
Tom.

OFFICIAL

Good afternoon Tom,

Thanks for your email. The proposal seems acceptable in principle, but for completeness, would you be able to send us a plan showing the location of the barns / detention basins etc, please?

Regards,

Katia Rajovic (on behalf of)
Flood Risk Management Team

Good afternoon Tom

I have been forwarded your request for a Contact Email address to allow you to communicate on works.

If you use this shared email group – a member of the team will respond when able.

Kind regards.
Euan
